Hamilton City Council Review of QLIMS

Laboratory Information Management

Hamilton City Council is part of the Hamilton Region which is rich in Maori History and is at the centre of one of the richest agricultural and pastoral areas in the world, due to this, Hamilton has become an asset to the Waikato Region. Hamilton's Dairy Industry hosts a world class centre of agricultural biotech excellence and home to a number of New Zealand's research facilities.

Hamilton City Council has been using the OnQ Software's Information Laboratory Management System Solutions to assist them in their ability to log samples, track testing and report data.

Sampling and Analysis Team Leader Geraldine McHaffie explains that Hamilton City Council's small laboratory provides a range of internationally accredited chemical and microbiological analysis on drinking water, natural water, wastewater, trade water, swimming pools and landfills.

Sample ID	Lot No	Method Name	Parameter Name	SRESLT	Result
2013000624	7	Metals	Ba		
2013000624	7	Metals	Cd		
2013000624	7	Metals	Cr		
2013000624	7	Metals	Fe		
2013000624	7	Metals	Ni		
2013000624	7	Metals	Hg		
2013000624	7	Metals	Pb		
2013000623	7	Metals	As		
2013000623	7	Metals	Bc		

**“QLIMS has been approved by our accrediting body as an acceptable system.”**

Geraldine further explains that their accreditation requires protection and the ability to attain traceable data management systems for their results.

QLIMS has been approved by their accrediting body as an acceptable system to allow complete protection and enable them to assess all the data that they require.

**“QLIMS allows us to create field worksheets, laboratory testing schedules, sample labels, automated data exports and analyses reports.”**

QLIMS permits Hamilton City Council's laboratory to create worksheets, samples and conduct necessary tests and analysis. The two step validation system allows controlled review of results, and the database allows users to customise access levels, layout and functions, which according to Geraldine is an integral aspect for their laboratory needs.

OnQ has partnerships with many local and international companies that share the same enthusiasm about our products.
